

PHYS 211: General Physics I

Explores college-level physics. Topics include the fundamental principles of mechanics, thermal properties of matter, electromagnetism, optics, and modern physics based on a knowledge of college-level algebra and trigonometry. Designed for majors who do not need calculus-based physics.

Credits: 4

Prerequisites:

HS or college trigonometry course.

Co-Requisites:

PHYS 211 Laboratory.

Program: *Physics*
