

MS 933: HIV/AIDS in a Global Context

Explores the global HIV/AIDS pandemic from various perspectives. It will look at the medical issues that the disease raises and its contribution to global poverty. It will explore the political, economic, social and security issues that its spread has created in Africa, and project future trajectories for the spread of the disease. The course will also attempt to formulate a Christian perspective on the proposed role of the church to prevent the spread of the pandemic, to provide services to minimize its affects and to minister to those infected and affected by the disease. The underlying assumption of these strategies will be to create interventions that are sustainable and community-based and have as their focal point the centrality of the local church in the areas that are most affected.
