

Associate of Arts in Pre-Nursing

A 2-year Associate of Arts degree in pre-nursing is available for students wishing to complete a nursing degree at another school. See the Associate of Arts Program section of this catalog for a description of the A.A. degree. Also, see the Health Care portion of the Department of Natural and Applied Sciences section of this catalog for a further description of the 4-year B.S.N. nursing program.

The pre-nursing A.A. program provides an opportunity to complete the usual nursing General Education requirements in the distinctive environment of a private Christian university. This program offers enough flexibility for a student to meet the specific requirements of most nursing schools.
