

Dual-Degree Program in Engineering

Evangel University offers a dual degree program whereby a student completes at least 82 credits at Evangel and then graduates from an ABET (Accreditation Board for Engineering and Technology) accredited engineering school. Upon graduation from the engineering school, the student is awarded two diplomas: a Bachelor of Science in Applied Mathematics from Evangel and an Engineering degree from the second institution. In this program, students can enjoy the benefits and enrichment of both a liberal arts and a professional engineering education, which makes them uniquely prepared for a variety of challenging and rewarding career options. Engineering possibilities are limited only by one's choice of the cooperating institution. This program is flexible and can be adjusted to meet the transfer requirements of most engineering schools.

Program: Physics

Type: Bachelor of Science

Total credits:

124
